

COSMIC FREQUENCY
ETHER PHYSICS BASIC PRINCIPLES

- **Time is not a constant**, Time is not linear but spherical with the generator of time being the consciousness or self-aware being.
- **Gravity is not a force**; objects are generated BY gravity which is a flow of the ether and is directly proportional to the attention which is directly proportional to awareness.
- **A soul is not a thing** it is the ether again. Aware of itself. It is a set of ideas and concepts.
- **Travel is based in Frequency** resonance.
- **Reality is relative** to the observing consciousness.
- **Ideas & perceptions mold** one's view of reality.
- **DNA & Genes are not fixed**. They become active based on the perceptions and beliefs held by a conscious being.
- **Dimensions are not separate things** that exist outside of the thoughts and ideas of a soul. They are states of mind
- **Everything Effects Everything**. If I am in a room and I add a pebble into the room, the frequency relations between all the items in the room now change and need to shift to make sense of and make space for the pebble. An average flow of potential energy between all the items in the room is based on each items flow and frequency. The flows come together to form what we see as the room which is the accumulated average of all the items in the room. Same thing if I remove the pebble the frequency harmonics shift again to create the average of the things that now makeup the room without the pebble.
- **Ether can be directed**, moved by motion of mass (chi gong body movements)
- **Ether can be focused**, flowed, intensified, and controlled by shapes, geometries, and patterns.
- **Ether can be controlled** by thought power and mental visualization.
- **Ether is the Prime Principle** of life force in all of its numerous forms and is the essence of all universal phenomena
